## WORK EXPERIENCE

### Frontend Software Developer (Part-time)

April 2025 - current

#### BASF SE | Ludwigshafen, Germany – Remote

- Assisted in developing web applications using Angular (including Typescript, HTML, CSS, Sass, etc.) with a focus on Angular Material, RxJs, component-based architecture, including component creation, styling, and application logic.
- Took part in the design, development and implementation of new user-facing features from start to finish.
- Consumed RESTful APIs to fetch and display dynamic data in the UI.
- Debugged UI issues using browser dev tools, improving performance and fixing rendering bugs.
- Collaborated in Agile development workflows using Azure DevOps for task tracking, version control, and CI/CD.
- Built unit and automated end-to-end tests with Cypress to ensure user flows and application behavior.

### Technical Support Specialist and B2B Support

November 2021 - November 2022

#### PartnerHero

- Delivered technical support by troubleshooting software issues and syncing with development team.
- Proposed improvements based on recurring issue analysis, helping optimize the platform.
- Managed high-level customer inquiries and improved team knowledge base through internal documentation
- Identified recurring technical issues and proposed solutions that improved performance.

## EDUCATION

### Bachelor of Science in Software Engineering

University of Europe for Applied Sciences

March 2023 – February 2026

## PERSONAL PROJECTS

- Created from scratch an event Planner Hub: Designed and developed a full-stack web app for event management using Angular, TypeScript, SCSS, and MongoDB. Implemented tools for task management, scheduling, and responsive design
